

GLOBALLY RECOGNIZED · VENDOR-NEUTRAL · ANSI-ALIGNED

Certified Agentic AI Healthcare Professional

— (CAAIHP)

Become a Globally Recognized Agentic AI Healthcare Professional

Earn the CAAIHP credential — gain the skills to design, deploy, and govern assistive, human-in-the-loop AI agents across clinical support, patient engagement, and healthcare operations, and command a **20–60% higher salary**.

4.8/5 Reviews.io (96%) · **4.4/5** Trustpilot · **2,50,000+** certified

Enroll at gsdcouncil.org/agent-ai-healthcare-certification

Why This Certification, Why Now

Health systems are moving agentic AI from pilots into real clinical and operational use — while upholding the highest standards of patient safety, privacy, and ethics of any industry. This is the skillset that bridges both sides.

Autonomous agents are entering healthcare

Hospitals already use AI agents to draft clinical documentation, navigate patients, and process claims and prior authorizations.

Clinicians are drowning in administrative work

AI scribes and workflow agents give hours back to patient care by automating documentation and coordination.

Patient safety and privacy set the highest bar

HIPAA, GDPR, bias, and human-in-the-loop requirements demand skills traditional AI training doesn't cover.

Leaders need trustworthy AI, not just pilots

Health systems want AI that is validated, explainable, and ethically deployed — not a black box.

FROM THEORY TO PRACTICE

What You'll Be Able to Do

Understand the fundamentals of agentic AI and its applications across modern healthcare

Explain agentic AI architectures, reasoning, memory, and autonomous decision-making

Apply agentic AI to clinical documentation, medical summarization, and decision support

Enhance patient care through AI-powered assistants, remote monitoring, and personalized healthcare

Automate healthcare operations including coding, billing, claims, and prior authorization

Ensure patient privacy, security, regulatory compliance, and responsible AI deployment across healthcare organizations

2,50,000+

professionals certified

500+

Fortune clients

190+

countries served

Since 2016

US · SG · Switzerland

Independent, vendor-neutral certification body established in 2016 — offices in the US, Singapore, and Switzerland.

Accredited by ABICB (Accreditation Board for International Certification Bodies) and a proud member of ANSI.

Alumni work at 500+ Fortune companies across 190+ countries; 100+ Authorized Training Partners worldwide.

Certification built and reviewed with AI practitioners, clinical informatics experts, and healthcare leaders deploying agentic AI responsibly.

IS THIS FOR YOU?

Who Is This Certification For?

- Clinicians, nurses, and allied health professionals
- Healthcare administrators and operations teams
- Health-IT, informatics, and digital-health specialists
- Healthcare leaders adopting AI responsibly
- Clinical research and agentic AI clinical trials professionals
- Pharma and life sciences professionals exploring agentic AI applications
- Anyone pursuing a certification in agentic AI for healthcare to advance their career

PRE-REQUISITES

There are no mandatory prerequisites. Familiarity with healthcare workflows and a basic understanding of AI will be beneficial, but no formal AI background is required — the program builds from the foundations of Agentic AI and applies them directly to real clinical, operational, and research workflows.

Learn from Experts

Learn from experienced practitioners and industry leaders who design, update, and teach the program — bringing real-world agentic AI and healthcare technology expertise to every module.

What You'll Learn

36+ hours across the full agentic healthcare lifecycle, with hands-on demos and real frameworks built into every module. Each module pairs videos and e-books with templates and Learn-By-Doing activities.

1

Foundations of AI, Generative AI, and Agentic AI

Autonomy, goal-orientation, and the shift from content generation to autonomous action

5

Healthcare Operations and Revenue Cycle

Coding, billing, claims, prior authorization, and capacity planning

2

Architecture of AI Agents and Multi-Agent Systems

LLM core, memory, planning, tool use, and orchestration frameworks

6

Population Health, Research, and Analytics

Risk stratification, clinical trials, FHIR/HL7, and predictive analytics

3

Agentic AI in Clinical Support and Documentation

AI scribes, decision support, evidence synthesis, and assistive triage

7

Safety, Privacy, Compliance, and Responsible AI

HIPAA/GDPR, human-in-the-loop, bias, and ethical deployment

4

Patient Engagement and Care Coordination

Health assistants, scheduling, remote monitoring, and adherence

8

Capstone Project — Applied Agentic Healthcare Workflow

Design a care-coordination or revenue-cycle workflow for a mock provider

Module-by-Module

Module 1 — Foundations of AI, Generative AI, and Agentic AI

- Evolution from Traditional AI to Generative AI to Agentic AI
- What makes AI “agentic”: autonomy, goal-orientation, and decision-making
- Generative vs agentic AI: content creation vs autonomous action
- Core concepts: agents, environments, goals, actions, and feedback loops
- Overview of the agentic AI landscape and enterprise use cases

Module 2 — Architecture of AI Agents and Multi-Agent Systems

- Anatomy of an AI agent: LLM core, memory, planning, and tool use
- Reasoning and planning techniques (ReAct, Chain-of-Thought, Reflection)
- Memory systems: short-term, long-term, and Retrieval-Augmented Generation (RAG)
- Tool calling, function calling, and API/data integration
- Multi-agent orchestration, collaboration, and workflow design
- Popular agentic frameworks (LangChain, LangGraph, AutoGen, CrewAI)

Module 3 — Agentic AI in Clinical Support and Documentation

- AI scribes and autonomous clinical documentation
- Clinical decision-support and summarization agents
- Medical-literature review and evidence synthesis
- Diagnostic and triage support (assistive, human-in-the-loop)

Module 4 — Patient Engagement and Care Coordination

- Conversational health assistants and patient navigation
- Appointment scheduling and follow-up agents
- Remote monitoring and chronic-care support
- Personalized patient education and adherence

Module-by-Module

Module 5 — Healthcare Operations and Revenue Cycle

- Agentic automation of administrative workflows
- Medical coding, billing, and claims processing
- Prior authorization and eligibility verification
- Capacity, scheduling, and resource optimization

Module 6 — Population Health, Research, and Analytics

- Population-health insights and risk stratification
- Agentic support for clinical research and trials
- Healthcare data integration and interoperability (FHIR/HL7)
- Predictive analytics for outcomes and operations

Module 7 — Safety, Privacy, Compliance, and Responsible AI in Healthcare

- Patient safety and human-in-the-loop requirements
- Data privacy and regulatory compliance (HIPAA, GDPR)
- Bias, fairness, and health equity
- Explainability, validation, and ethical deployment

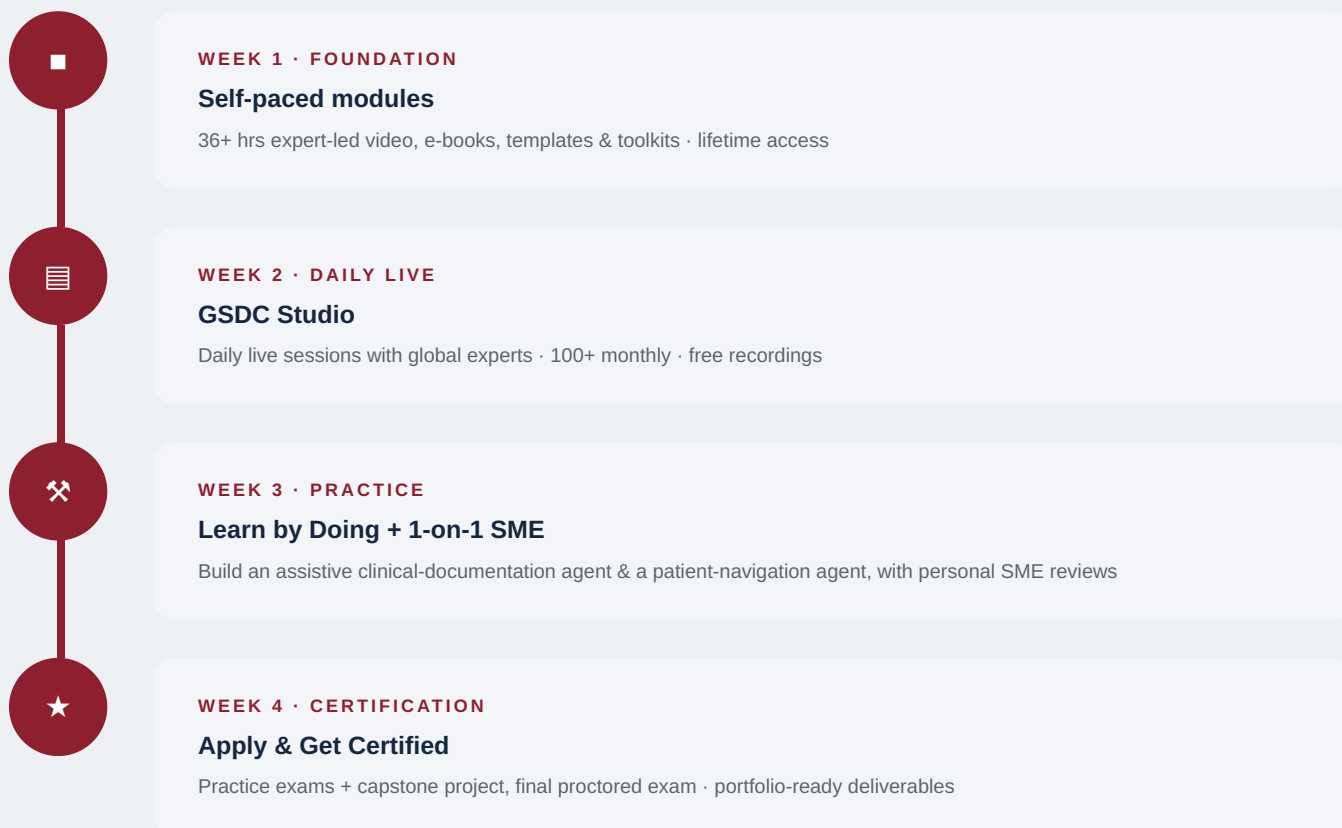

Capstone Project · Applied Agentic Healthcare Workflow

— Design an agentic healthcare workflow (such as care coordination or revenue cycle) for a mock provider, with safety and privacy controls — SME-reviewed, portfolio-ready. Plus 1-on-1 and daily expert sessions.

A Guided 4-Week Path to Certification

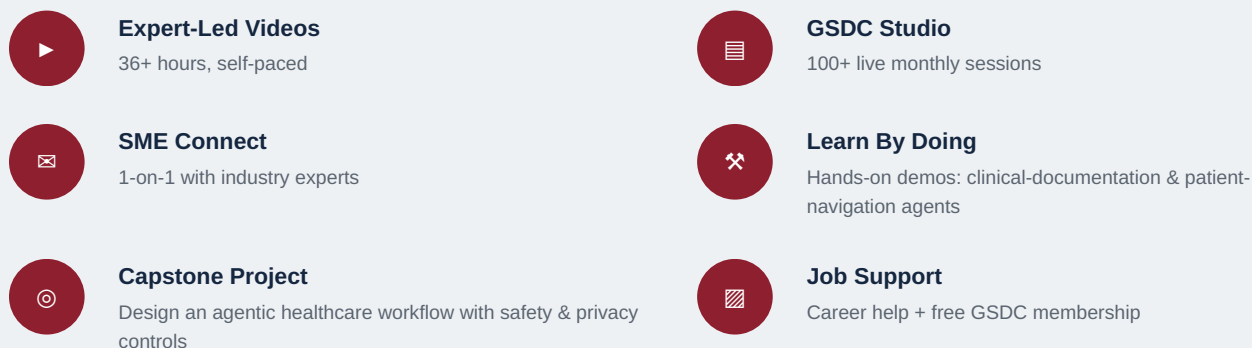

Self-paced study, daily live sessions, personal mentoring, and hands-on practice — finish in as little as one week.

Move at your own pace. This is a suggested roadmap — driven learners can finish in as little as one week.

ALL IN ONE ENROLLMENT

Everything Included

Exam & What to Expect

This is a certification, not a course. Study self-paced with the materials provided (plus live support), then sit a proctored online exam. Lifetime access to materials, plus 2 practice exams.

IS THIS FOR YOU?

Who Is This Certification For?

YOUR ROLE	HOW CAAIHP HELPS YOU	CAREER OUTCOME
Clinician / Nurse	Reduce documentation burden with AI scribes and assistive decision support.	→ Clinical AI Champion
Healthcare Administrator	Automate scheduling, capacity, and administrative workflows with agents.	→ Healthcare Operations AI Lead
Health-IT / Informatics Specialist	Design and integrate agentic workflows with EHR, FHIR, and HL7 systems.	→ Health AI Solutions Architect
Revenue Cycle Professional	Apply agents to coding, billing, claims, and prior authorization.	→ Revenue Cycle AI Specialist
Clinical Research Professional	Use agents for literature review, trial support, and population analytics.	→ Clinical Research AI Lead
Healthcare Leader / Compliance	Govern safe, private, and ethical AI adoption across the organization.	→ AI Governance & Safety Lead

No formal AI background required — built for healthcare professionals at every level, from clinicians to leaders, ready to apply agentic AI responsibly.

7-Day Money-Back Guarantee

Enroll with zero risk — full refund within 7 days if you feel you haven't gained the skills you're looking for. Includes a complimentary exam retake and lifetime access to your materials.
