Why This Certification, Why Now

Outsourcing keeps growing, but the risk never leaves your balance sheet. The organizations that stay resilient are the ones that manage third-party risk as a discipline — that capability is where certified TPRM practitioners earn their seat.

Third-party failure becomes enterprise failure

A single vendor breach, outage, or compliance lapse cascades straight into your operations, customers, and brand.

Regulators now expect formal TPRM

DORA, the OCC/FED/FDIC guidance, EBA outsourcing rules and sector regulators demand documented third-party oversight.

Fourth-party and nth-party risk is expanding

Subcontractors, cloud dependencies and concentration risk push exposure far beyond your direct suppliers.

Cloud, AI and emerging tech raise new exposure

AI-enabled services, hosting models and obsolescence create risks that legacy vendor checklists never covered.

FROM THEORY TO PRACTICE

What You'll Be Able to Do

Position TPRM within enterprise risk management and the three lines of defense

Tier suppliers by criticality and align due-diligence depth to inherent risk

Design a TPRM programme: governance, policy hierarchy, risk appetite and contractual protections

Run the full third-party lifecycle — sourcing, due diligence, onboarding, monitoring and offboarding

Evaluate supplier controls across governance, information security, resilience and financial viability

Operate continuous and event-driven monitoring with KRIs, KPIs and board-level reporting

IS THIS FOR YOU?

Who Is This Certification For?

- Third-party / vendor risk management professionals
- GRC, operational risk and enterprise risk practitioners
- Procurement, sourcing and supplier management leaders
- Information security, compliance and internal audit professionals
- Business continuity, resilience and data-privacy specialists
- Consultants and managers building or maturing a TPRM programme

PRE-REQUISITES

Basic understanding of risk, compliance or supplier management is recommended. Experience in GRC, procurement, information security, audit or vendor management is beneficial. No programming or advanced technical knowledge is required, and no specific academic degree or prior risk certification is required.

Learn from Experts

Learn from experienced practitioners and industry leaders who design, update, and review the program — bringing real-world risk, governance and enterprise-assurance expertise to every module.

What You'll Learn

Nine modules across the full third-party risk lifecycle — from foundations and data governance to controls evaluation, monitoring and board-level oversight — with real-world scenarios and Learn-By-Doing activities in every module.

1

Third-Party Risk Management Foundations

TPRM terminology, the third-party landscape, three lines of defense, and TPRM within ERM.

2

Information Classification and Data Governance

Classification, ownership, privacy and cross-border transfers; mapping data flows to scope.

3

Risk Culture, Criticality and Third-Party Risk Drivers

Risk culture, inherent vs residual risk, criticality tiering, and third-party risk drivers.

4

TPRM Programme Design, Governance and Requirements

Programme charter, governance, policy hierarchy, risk appetite and contractual protections.

5

Third-Party Lifecycle and Risk Assessment Process

Sourcing, due diligence, onboarding, ongoing review, renewal and controlled offboarding.

6

Controls Evaluation: Governance, Risk and Compliance

Supplier governance, risk registers, compliance, attestations and subcontractor flow-down.

7

Controls Evaluation: Information Protection, IT Operations and Resilience

Security, resilience, cloud, BC/DR, backup and incident response control evaluation.

8

Financial, Reputational, Technology and Innovation Risk

Financial viability, reputational/ESG, obsolescence, and AI-enabled service risks.

9

Programme Operations, Monitoring, Reporting and Oversight

Monitoring at scale, remediation tracking, KRIs/KPIs, maturity and board reporting.

**Capstone Project · Applied Third-Party Risk Management**

Build and present a real-world TPRM deliverable — tier a supplier portfolio, scope and run a due-diligence assessment, evaluate controls, and define a monitoring and reporting plan — SME-reviewed and portfolio-ready. Plus 1-on-1 and daily expert sessions.

Module-by-Module

Module 1 — Third-Party Risk Management Foundations

- TPRM disciplines and terminology
- Why third-party failure becomes enterprise failure
- Third-party, fourth-party and nth-party risk landscape
- Roles of the first, second and third lines of defense
- Positioning TPRM within Enterprise Risk Management (ERM)
- Regulatory expectations and recognized TPRM frameworks

Module 2 — Information Classification and Data Governance

- Data classification schemes and handling requirements
- Data ownership, custodianship and stewardship
- Personal and regulated data in supplier relationships
- Privacy obligations and cross-border data transfers
- Data-sharing agreements
- Mapping data flows to determine assessment scope and depth

Module 3 — Risk Culture, Criticality and Third-Party Risk Drivers

- Building a strong risk culture and accountable ownership
- Inherent risk versus residual risk
- Criticality tiering and concentration risk
- Strategic and operational risk drivers
- Financial and reputational risk drivers
- Regulatory, technology and geographic risk drivers
- Aligning risk drivers with due-diligence effort

Module 4 — TPRM Programme Design, Governance and Requirements

- TPRM programme charter and operating model
- Governance and committee structures
- Policy, standards and procedure hierarchy
- Risk appetite and tolerance statements
- Developing programme requirements and control expectations
- Contractual protections and risk provisions
- Right-to-audit clauses
- Service Level Agreements (SLAs)
- Exit and termination provisions

Module 5 — Third-Party Lifecycle and Risk Assessment Process

- Planning and sourcing
- Pre-contract due diligence
- Questionnaire design and evidence collection
- Onsite, remote and validated assessment approaches
- Standardized assessments and certifications
- Third-party onboarding
- Ongoing review and assessment cadence
- Contract renewal and reassessment
- Controlled termination and offboarding

Module-by-Module

Module 6 — Controls Evaluation: Governance, Risk and Compliance

- Evaluating supplier governance structures
- Policy frameworks and risk registers
- Issue identification and management
- Compliance with applicable laws and regulations
- Industry standards and control requirements
- Assurance reports and independent attestations
- Subcontractor governance
- Downstream flow-down of TPRM requirements

Module 7 — Controls Evaluation: Information Protection, IT Operations and Resilience

- Access management and identity controls
- Encryption and data protection
- Network and endpoint security
- Secure development practices
- IT asset management
- Change and configuration management
- Cloud and hosting considerations
- Business continuity and disaster recovery
- Backup, recovery and testing
- Cybersecurity incident response
- Threat management
- Supplier incident notification obligations

Module 8 — Financial, Reputational, Technology and Innovation Risk

- Assessing supplier financial viability
- Financial early-warning indicators
- Reputational and ESG exposure
- Technology and obsolescence risk
- Emerging technology and automation risks
- AI-enabled service risks
- Interdependencies across financial, reputational and technology risks
- Building an effective control environment across risk domains

Module 9 — Programme Operations, Monitoring, Reporting and Oversight

- Executing the assessment plan at scale
- Post-assessment reporting
- Findings, risk acceptance and remediation tracking
- Continuous monitoring of critical third parties
- Event-driven monitoring
- Managing TPRM information, tooling and records
- Key Risk Indicators (KRIs)
- Key Performance Indicators (KPIs)
- TPRM maturity models
- Governance and escalation
- Board-level oversight and reporting

Capstone Project · Applied Third-Party Risk Management

Build and present a real-world TPRM deliverable — tier a supplier portfolio, scope and run a due-diligence assessment, evaluate controls, and define a monitoring and reporting plan — SME-reviewed and portfolio-ready. Plus 1-on-1 and daily expert sessions.

A Guided Path to Certification

Self-paced study, daily live sessions, personal mentoring, and hands-on practice — finish at your own pace.

STEP 1 • FOUNDATION

Self-paced modules

36+ hrs expert-led video, e-books, templates, cheat sheets & toolkits · lifetime access

STEP 2 • DAILY LIVE

GSDC Studio

Daily live sessions with global experts · 100+ monthly · free recordings

STEP 3 • PRACTICE

Learn by Doing + 1-on-1 SME

Build a TPRM assessment & programme plan for a real scenario, with personal SME reviews

STEP 4 • CERTIFICATION

Apply & Get Certified

Practice exams + capstone project, final proctored exam · portfolio-ready deliverables

Move at your own pace. Study self-paced with lifetime access to all materials, live sessions, and recordings.

ALL IN ONE ENROLLMENT
