

GLOBALLY RECOGNIZED · VENDOR-NEUTRAL · ANSI-ALIGNED

Certified Agentic AI Project Management Professional

— (CAAIPMP)

Become a Globally Recognized Agentic AI Project Management Professional

Earn the CAAIPMP credential — gain the skills to embed autonomous AI agents across the project lifecycle, automating planning, reporting, resource and risk management, and PMO operations, and command a **20–60% higher salary**

4.8/5 Reviews.io (96%) · 4.4/5 Trustpilot · 2,50,000+ certified

Enroll at gsdcouncil.org/agentic-ai-project-management-professional

Why This Certification, Why Now

Delivery teams are embedding autonomous AI agents across planning, reporting, and portfolio operations — while keeping accountability firmly with people. This is the skillset that bridges both sides.

Autonomous agents are entering project delivery

Project managers already use AI agents to draft charters, compile status reports, flag emerging risks, and summarize stakeholder meetings.

Reporting and admin are consuming delivery time

Status updates, minutes, and documentation are moving from hours to minutes with agentic workflows.

Portfolios demand real-time visibility

Dependency mapping, health scoring, and predictive analytics now run agent-assisted, connected to tools like Jira, MS Project, and Asana.

Accountability must stay with people

Human oversight, decision boundaries, and change management demand skills traditional PM training doesn't cover.

What You'll Be Able to Do

Understand the fundamentals of agentic AI and its applications in modern project management

Explain agentic AI architectures, reasoning, memory, and autonomous project workflows

Apply agentic AI across project planning, scheduling, execution, monitoring, and reporting

Automate project management tasks including resource allocation, cost estimation, and risk management

Leverage AI agents for stakeholder communication, documentation, meeting summaries, and PMO/portfolio optimization

Ensure responsible AI adoption through transparency, data privacy, governance, and human oversight

IS THIS FOR YOU?

Who Is This Certification For?

- Project managers and program coordinators
- PMO leaders and delivery managers
- Business analysts and team leads
- Professionals driving AI-augmented project delivery
- Professionals exploring agentic AI roles in project and portfolio management
- Scrum masters and agile practitioners adopting AI-driven workflows
- Anyone pursuing a certification in agentic AI for project management to advance their career

PRE-REQUISITES

There are no mandatory prerequisites. Familiarity with project-management principles and a basic understanding of AI will be beneficial, but no formal AI background is required — the program builds from the foundations of Agentic AI and applies them directly to real project, program, and PMO workflows.

Learn from Experts

Learn from experienced practitioners and industry leaders who design, update, and teach the program — bringing real-world agentic AI and project delivery expertise to every module.

What You'll Learn

36+ hours across the full project lifecycle, with hands-on demos and real frameworks built into every module. Each module pairs videos and e-books with templates and Learn-By-Doing activities.

1

Foundations of AI, Generative AI, and Agentic AI

Autonomy, goal-orientation, and the shift from content generation to autonomous action

5

Stakeholder, Communication, and Documentation

Meeting summaries, comms planning, and knowledge capture

2

Architecture of AI Agents and Multi-Agent Systems

LLM core, memory, planning, tool use, and orchestration frameworks

6

Agentic PMO and Portfolio Management

Portfolio governance, dashboards, and Jira / MS Project / Asana

3

Agentic AI Across the Project Lifecycle

Charters, WBS, scheduling, critical path, and status reporting

7

Governance, Ethics, and Responsible AI in Delivery

Human oversight, privacy, trust, and change management

4

Resource, Cost, and Risk Management with Agents

Resource allocation, budgeting, predictive risk, and issue triage

8

Capstone Project — Applied Agentic PM Workflow

Design a planning-to-reporting workflow for a simulated project

Module-by-Module

Module 1 — Foundations of AI, Generative AI, and Agentic AI

- Evolution from Traditional AI to Generative AI to Agentic AI
- What makes AI “agentic”: autonomy, goal-orientation, and decision-making
- Generative vs agentic AI: content creation vs autonomous action
- Core concepts: agents, environments, goals, actions, and feedback loops
- Overview of the agentic AI landscape and enterprise use cases

Module 2 — Architecture of AI Agents and Multi-Agent Systems

- Anatomy of an AI agent: LLM core, memory, planning, and tool use
- Reasoning and planning techniques (ReAct, Chain-of-Thought, Reflection)
- Memory systems: short-term, long-term, and Retrieval-Augmented Generation (RAG)
- Tool calling, function calling, and API/data integration
- Multi-agent orchestration, collaboration, and workflow design
- Popular agentic frameworks (LangChain, LangGraph, AutoGen, CrewAI)

Module 3 — Agentic AI Across the Project Lifecycle

- AI agents in initiation, planning, execution, and closure
- Automated project charters, scope, and work-breakdown structures
- Intelligent scheduling, estimation, and critical-path analysis
- Autonomous status reporting and stakeholder updates

Module 4 — Resource, Cost, and Risk Management with Agents

- AI-driven resource allocation and capacity planning
- Automated cost estimation, budgeting, and tracking

- Predictive risk identification and mitigation planning
- Issue triage and change-request management

DETAILED CURRICULUM (CONTINUED)

Module-by-Module

Module 5 — Stakeholder, Communication, and Documentation

- Autonomous meeting summaries, minutes, and action items
- Stakeholder analysis and communication-planning agents
- Automated project documentation and knowledge capture
- Sentiment and engagement monitoring

Module 6 — Agentic PMO and Portfolio Management

- AI agents for portfolio prioritization and governance
- Cross-project dependency and resource optimization
- Real-time portfolio dashboards and health scoring
- Integrating agents with PM tools (Jira, MS Project, Asana)

Module 7 — Governance, Ethics, and Responsible AI in Project Delivery

- Human oversight, accountability, and decision boundaries
- Data privacy and security of project information
- Bias, transparency, and trust in AI recommendations
- Change management for AI-augmented teams

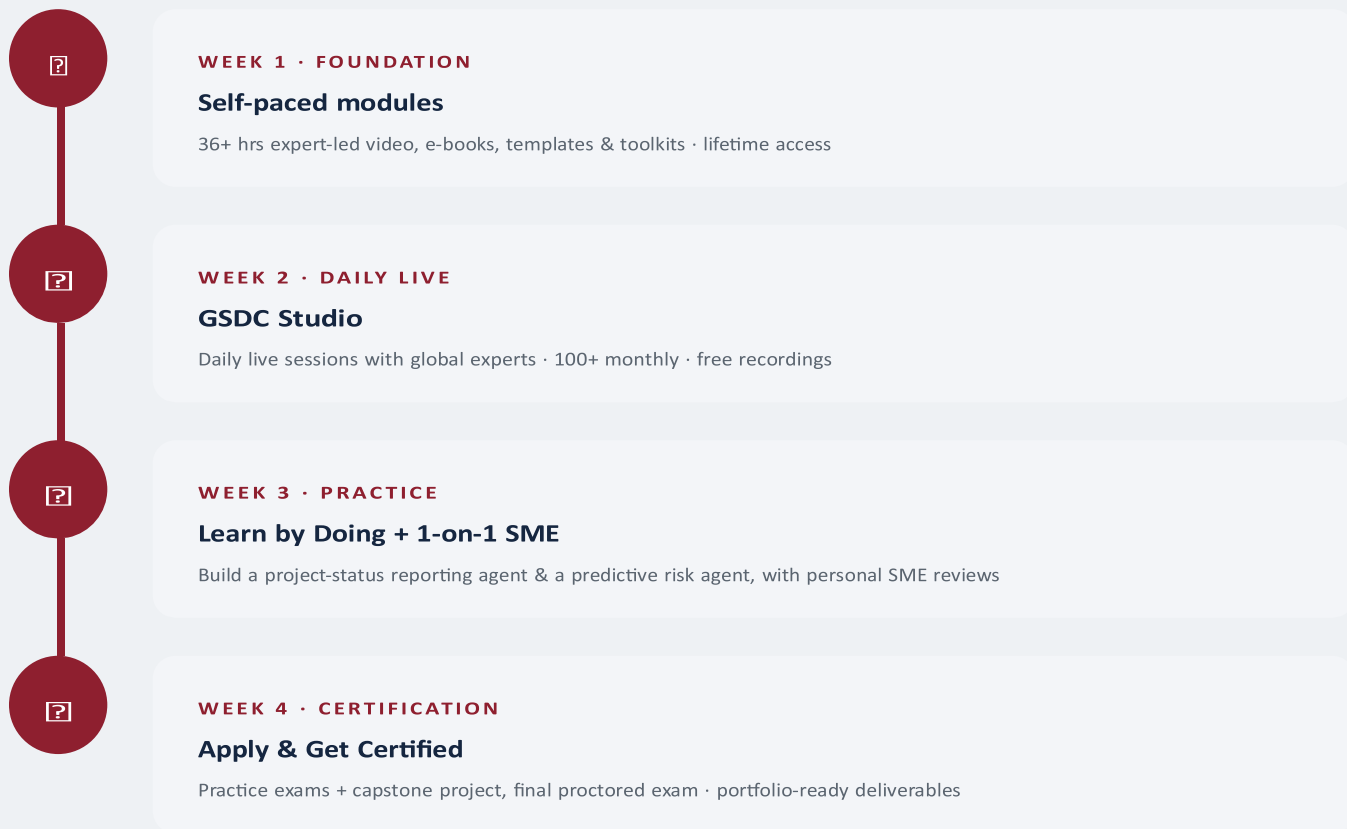

Capstone Project • Applied Agentic PM Workflow

— Design an agentic project-management workflow for a simulated project, spanning planning, tracking, and reporting —
SME-reviewed, portfolio-ready. Plus 1-on-1 and daily expert sessions.

A Guided 4-Week Path to Certification

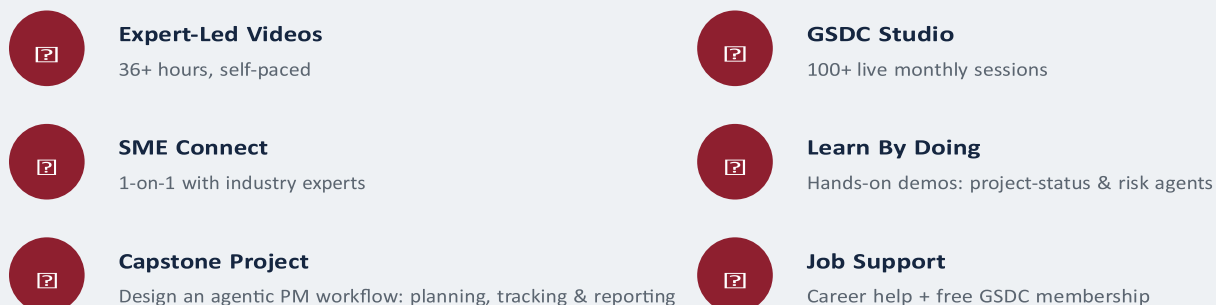

Self-paced study, daily live sessions, personal mentoring, and hands-on practice — finish in as little as one week.

Move at your own pace. This is a suggested roadmap — driven learners can finish in as little as one week.

ALL IN ONE ENROLLMENT

Everything Included

KNOW BEFORE YOU ENROLL

Exam & What to Expect

This is a certification, not a course. Study self-paced with the materials provided (plus live support), then sit a proctored online exam. Lifetime access to materials, plus 2 practice exams.

IS THIS FOR YOU?

Who Is This Certification For?

YOUR ROLE	HOW CAAIPMP HELPS YOU	CAREER OUTCOME
Project Manager	Automate charters, schedules, status reports, and stakeholder updates.	→ AI-Augmented Project Manager
Program Coordinator	Orchestrate cross-project dependencies and reporting with agents.	→ AI Program Management Lead
PMO Leader / Delivery Manager	Run portfolio governance, dashboards, and health scoring with agents.	→ Agentic PMO Lead
Business Analyst	Automate documentation, requirements capture, and meeting insights.	→ AI Delivery Analyst
Team Lead	Free the team from admin with status, triage, and communication agents.	→ AI Workflow Lead
Risk / Governance Professional	Keep oversight, privacy, and accountability at the core of AI delivery.	→ AI Governance & Delivery Lead

No formal AI background required — built for project professionals at every level, from coordinators to PMO leaders, ready to lead AI-augmented delivery.

7-Day Money-Back Guarantee

Enroll with zero risk — full refund within 7 days if you feel you haven't gained the skills you're looking for. Includes a complimentary exam retake and lifetime access to your materials.
