An Overview

What You Can Expect From This Program?

With the GSDC Certified Site Reliability Engineer certification, professionals can validate their expertise in designing, building, and operating highly reliable and scalable distributed systems. The primary objective is to demonstrate proficiency in applying Site Reliability Engineering (SRE) principles, practices, and methodologies to real-world scenarios.

Certified Site Reliability Engineers possess a comprehensive understanding of SRE concepts, such as service level objectives (SLOs), error budgets, incident management, and automating operations tasks. They have the ability to implement robust monitoring and alerting systems, perform effective troubleshooting, and ensure system resilience through techniques like chaos engineering.

To attain the GSDC Certified Site Reliability Engineer status, individuals must complete an accredited training program and pass a rigorous examination. This certification is highly valued in organizations that prioritize service reliability, performance, and efficient management of large-scale, complex systems.

Certified Learning & Development Professional CLDP
 I took the certification course "Certified Learning & Development Professional CLDP" approved by the GSDC - Global Skill Development Council. So grateful to the professional team at the GSDC for this enlightening opportunity; namely, Ruguozeno, for her dedication, responsiveness, and constant support throughout this learning journey. And very special thanks to the amazing trainer and coach Deepak Sharma for the great weekly live sessions which I believe are the highlight of this certification programme. His knowledge, expertise, and outstanding skills have made the course very insightful, engaging, and enjoyable!
