## WHY AI GRC – WHY NOW

# Every organization using AI now needs someone to govern it.

From startups to hospitals, banks, and governments – every organization using AI needs people who can build governance frameworks, assess AI risks, and ensure compliance with fast-evolving regulations. This isn't a niche skill; it's a core organizational need.

Roles like AI Risk Analyst, AI Compliance Officer, AI Governance Lead, and Chief AI Ethics Officer are appearing across industries. This vendor-neutral certification positions you to lead AI oversight and advise leadership on responsible AI strategy.

- Data Protection Officer – 12%
- Other Roles – 8%

Adoption by Industry

Join them – Enroll →

## WHAT YOU'LL BE ABLE TO DO

# Skills you can use the day you finish

- ✓ Apply core AI Governance, Risk & Compliance principles in real organizations
- ✓ Identify, assess, and manage AI risks across the full lifecycle – GenAI, agentic AI, LLMs
- ✓ Apply global frameworks: NIST AI RMF, ISO 42001, and OECD AI Principles
- ✓ Navigate global AI regulations – EU AI Act, data protection, industry-specific rules
- ✓ Apply responsible-AI principles: fairness, transparency, explainability, human oversight
- ✓ Design AI security controls, manage adversarial risk, and build trustworthy AI programs
- ✓ Plan, conduct, and report on AI audits and compliance assessments
- ✓ Lead an enterprise AI GRC program and drive responsible AI adoption

[Validate these skills – Enroll →](#)

## WHO SHOULD ENROLL

# Built for the people accountable for AI risk

Risk & Compliance Managers

Chief Risk / Compliance Officers

AI Governance & Ethics Professionals

InfoSec Managers & CISOs

Internal & External Auditors

Legal & Regulatory Affairs

Data Protection Officers

IT Managers & Tech Directors

GRC Professionals specializing in AI

Policy & Governance Professionals

Business Analysts (regulated industries)

Risk / Audit / Compliance Consultants

### No mandatory prerequisites

Some familiarity with risk, compliance, governance, or technology helps, but the program starts from AI-governance fundamentals and builds into applied GRC skills. No prior AI or technical background required.
