Introduction

Cloud Computing Foundation Certification (CCF)

The GSDC Cloud Computing Foundation Certification (CCF) is a reputable certification that validates an individual's knowledge and skills in the core concepts of cloud computing. Designed for professionals looking to enhance their understanding of cloud computing and its applications, the Cloud Computing Certification serves as a testament to their expertise in the field. The certification exam, provided by GSDC, assesses candidates' comprehension of key topics such as virtualization, service models, deployment models, and security considerations in cloud computing.

The Cloud Computing Foundation Certification exam evaluates candidates' ability to apply cloud computing principles to practical scenarios, covering important areas such as cloud service models (SaaS, PaaS, and IaaS), cloud deployment models (public, private, and hybrid clouds), virtualization technologies, and cloud security considerations.

As a recognized standard among employers and organizations, the CCF certification provides assurance that certified individuals possess the necessary knowledge to contribute effectively to cloud computing initiatives.

Certified Learning & Development Professional CLDP
I took the certification course "Certified Learning & Development Professional CLDP" approved by the GSDC - Global Skill Development Council. So grateful to the professional team at the GSDC for this enlightening opportunity; namely, Ruguzeno, for her dedication, responsiveness, and constant support throughout this learning journey. And very special thanks to the amazing trainer and coach Deepak Sharma for the great weekly live sessions which I believe are the highlight of this certification programme. His knowledge, expertise, and outstanding skills have made the course very insightful, engaging, and enjoyable!
