THE OPPORTUNITY

Why This Certification, Why Now

Organizations are racing to adopt AI — while regulators and boards demand proof it's being governed responsibly. This is the credential that bridges both sides.

AI adoption is outpacing governance

Organizations are deploying AI faster than they can govern it — creating real accountability gaps.

ISO/IEC 42001:2023 is the new global standard

The world's first AI Management System standard now defines what responsible AI governance looks like.

AI auditing needs specialized skills

Auditing AI systems means assessing risks, bias, and transparency — skills traditional audit training doesn't cover.

Boards want accountable, trustworthy AI

Leaders need auditors who can verify AI systems are managed ethically, legally, and transparently.

FROM THEORY TO PRACTICE

What You'll Be Able to Do

- ✓ Understand the structure, principles, and requirements of the ISO/IEC 42001:2023 standard for AI Management Systems (AIMS)
- ✓ Assess an organization's ability to manage AI systems ethically, legally, and transparently
- ✓ Identify and evaluate risks, controls, and governance mechanisms within AI-based operations
- ✓ Plan, conduct, and close an ISO/IEC 42001 compliance audit, following ISO 19011 and ISO/IEC 17021-1 guidelines
- ✓ Verify conformity of AIMS with ISO 42001 certification requirements to ensure operational excellence
- ✓ Communicate audit findings effectively and recommend corrective actions for continuous improvement

16+ Hrs

of expert-led learning with AI-based roleplay & simulations, two exam attempts, and a free Job Support Program.

What You'll Learn

16+ hours across the full AIMS audit lifecycle, with case studies, an auditing toolkit, and AI-based roleplay built into the program. Each module pairs videos and e-books with templates and reference material.

1 Introduction to AI Management Systems (AIMS)
AI overview, sector impact, and responsible AI management

2 ISO 42001:2023 Standard
Scope, application, and context of the organization

3 Leadership in AI Management Systems
Leadership commitment, AI policy, roles & responsibilities

4 Planning in AI Management Systems
Risks, opportunities, and AI objective setting

5 Support for AI Management Systems
Resources, competence, communication, documentation

6 Operation of AI Management Systems
Operational control, AI risk assessments, impact assessments

7 Performance Evaluation
Monitoring, internal audits, management review

8 Improvement Processes
Continual improvement, nonconformities, corrective actions

9 Audit Principles and Practices
Audit concepts, planning, documents & checklists

10 Conducting the Audit
On-site activities, evidence collection, communication

11 Closing the Audit
Audit reports, closing meetings, follow-up actions

Module-by-Module

- **Module 1 — Introduction to AI Management Systems (AIMS)**

- Overview of Artificial Intelligence (AI)
- Impact of AI on various sectors
- Key features and challenges of AI systems
- Importance of managing AI systems responsibly

- **Module 2 — ISO 42001:2023 Standard**

- Scope and application of ISO 42001
- Normative references and terms and definitions
- Context of the organization and its impact on AI management systems

- **Module 3 — Leadership in AI Management Systems**

- Leadership and commitment requirements
- Formulating and communicating AI policy
- Defining roles, responsibilities, and authorities

- **Module 4 — Planning in AI Management Systems**

- Addressing risks and opportunities
- Setting and planning AI objectives
- Planning for changes in AI management systems

- **Module 5 — Support for AI Management Systems**

- Determining and providing necessary resources
- Ensuring competence and awareness
- Effective internal and external communication
- Control of documented information

- **Module 6 — Operation of AI Management Systems**

- Operational planning and control
- AI risk assessments and treatments
- AI system impact assessments

Module-by-Module

- **Module 7 — Performance Evaluation**
 - Monitoring, measurement, analysis, and evaluation
 - Conducting internal audits
 - Management review processes
- **Module 8 — Improvement Processes**
 - Continual improvement strategies
 - Handling nonconformities and corrective actions
- **Module 9 — Audit Principles and Practices**
 - Fundamental audit concepts and principles
 - Planning and initiating audits
 - Preparing audit documents and checklists
- **Module 10 — Conducting the Audit**
 - On-site audit activities
 - Collecting and verifying audit evidence
 - Effective communication during audits
- **Module 11 — Closing the Audit**
 - Preparing audit reports and documentation
 - Conducting closing meetings
 - Follow-up actions and continual improvement

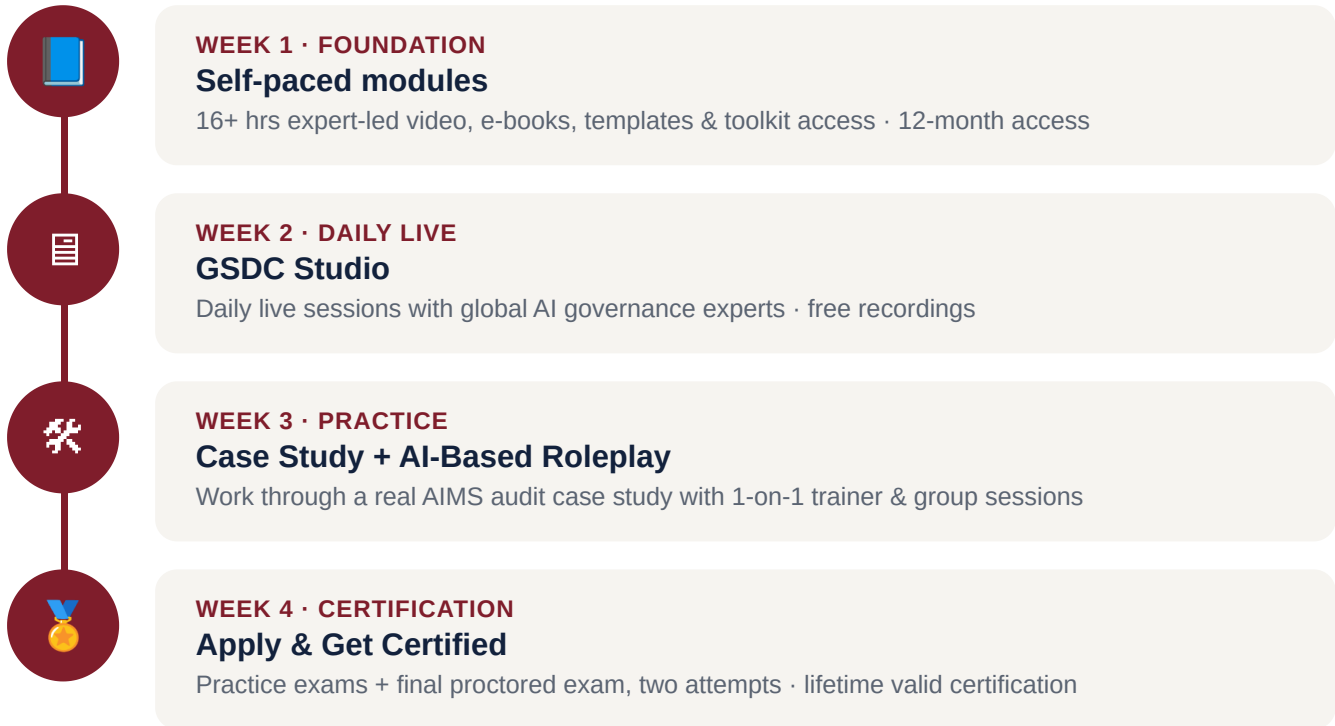

Plus: Case Study, Auditing Toolkit & Personalized Sessions — Work through a real-world AIMS audit case study, get access to the ISO 42001 Auditing Toolkit, and receive a personalized 1-on-1 trainer session plus weekly group connect sessions.

YOUR LEARNING JOURNEY

A Guided 4-Week Path to Certification

Self-paced study, daily live sessions, personal mentoring, and hands-on practice — finish in as little as one week.

Move at your own pace.

This is a suggested roadmap — driven learners can finish in as little as one week.

ALL IN ONE ENROLLMENT

Everything Included

Expert-Led Videos
16+ hours, self-paced

SME Connect
1-on-1 with industry experts

AI-Based Roleplay
Real-life audit simulations

GSDC Studio
Daily live sessions

Book of Knowledge
Study material, templates & toolkit

Job Support
Career help + free GSDC membership

KNOW BEFORE YOU ENROLL

Exam & What to Expect

This is a certification, not a course. Study self-paced with the materials provided (plus live support), then sit a proctored online exam. Lifetime valid certification, plus 2 practice exams.

62 Questions	MCQ Format	English Language	70% Pass score
130 min Duration	Yes Proctored	5 yrs Validity	Yes Complimentary Retake

IS THIS FOR YOU?

Who Is This Certification For?

YOUR ROLE	HOW THIS CERTIFICATION HELPS YOU	CAREER OUTCOME
Internal / External Auditor	Apply ISO/IEC 42001 audit methodology to AI systems and management processes.	→ ISO 42001 Lead Auditor
IT / Security Manager	Lead AI governance, risk assessment, and compliance audits within your organization.	→ AI Governance Lead
Risk & Compliance Professional	Assess AIMS risk, controls, and conformity against ISO 42001 requirements.	→ AI Risk & Compliance Manager
AIMS / Management-System Consultant	Design and implement AI Management Systems aligned with ISO 42001.	→ AIMS Implementation Lead
AI Ethics / Legal Expert	Evaluate the ethical, legal, and transparency requirements of AI systems.	→ AI Ethics & Governance Advisor
AI Architect / Data Scientist / Engineer	Bridge technical AI systems with governance and audit requirements.	→ AI Governance Architect

No mandatory prerequisites. Professionals at every level — from auditors to AI architects — are welcome.
